Protégé™ CFP

ABOVE GROUND POOL SYSTEMS

Protégé™ Series

ABOVE GROUND POOL FILTERS & PUMPS

About the Protégé CFP

Don't miss a day of pool fun with our Protégé CFP system. The system includes our AGP above ground pool pump and cartridge filter. The CFP system is fully packaged with a ready-to-build assembly and easy-to-follow instructions making your installation a breeze.

The Protégé AGP pool pump and cartridge filter system removes small particles and unwanted debris. Together they keep your pool sparkling clean and free of unwanted deposits.

The cartridge filter is built with durable, weather-resistant materials. It is equipped with a strong, easy-open ring lock lid, allowing for effortless cleaning and maintenance.

The Protégé CFP was designed for easy setup, operation and maintenance.

The Complete Package

All of our Protégé Series products pair perfectly with our Raypak pool heaters. No matter what setup or fuel type you need we have the right heating solution.

- Gas heaters up to 150 MBTUH
- Heat Pump heaters up to 61 MBTUH
- Electric heaters up to 92 MBTUH

Complete your system with the Protégé Series.

The Protégé Series above ground pool pumps and filters keep your above ground pool clean and ready to enjoy. The series works perfectly in combination with our gas, heat pump and electric pool heaters. You can combine our Sand Filter (SF) with either the Above Ground Pump (AGP) or our Variable Speed Pump (VSP). For a complete ready to install system our Cartridge Filter Pump (CFP) or Sand Filter Pump (SFP) are the best choice.

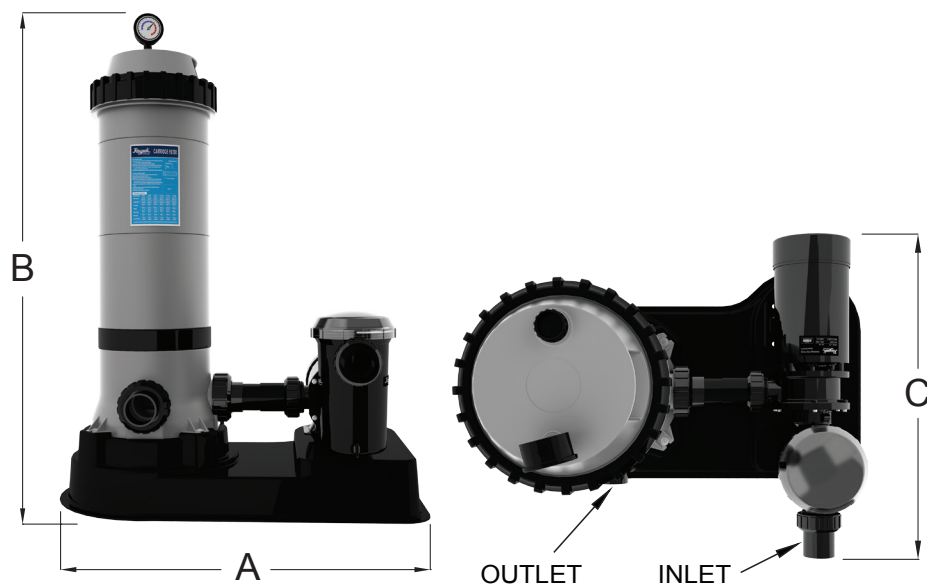

Boost Performance

Protégé products are the perfect companion to our pool heaters. Keeping your system clean and clear of debris helps the performance of your heater and contributes to the health and longevity of your above ground pool system.

Build Your System

Our Protégé Series gives you the most options for building your ideal above ground pool system.

Indoor and Outdoor Weatherproof Materials

Protégé products are constructed with durable materials that stand up to normal weather conditions and can be installed indoor or outdoor.

Easy to Maintain

Protégé products are designed to make cleaning easy, with large baskets on our pumps and a transparent lid that let's you check the level of trapped debris at a glance.

Easy To Connect

Protégé products are quick and easy to install onto existing above ground pool pads or on new above ground pools. Save even more time and money when installing one of our filter/pump combination systems.
