About the Protégé SFP

Raypak's Protégé SFP sand filter and pump are the way to keep your pool crystal clear all year long. This system brings together our Protégé SF sand filter and our AGP above-ground pool pump. The SFP system is a fully packaged ready-to-build assembly making the installation process a breeze.

The Protégé SFP utilizes sand's inherent ability to screen out and filter debris, and is energy and cost efficient. It is equipped with a backwash setting so particles will not get caught in the filter. You can feel good about the Protégé SFP system because it requires no chemicals, creates little waste and is energy efficient. Enjoy your above ground sparkling clean pool year round with the Raypak's Protégé SFP.

The Complete Package

All of our Protégé Series products pair perfectly with our Raypak pool heaters. No matter what setup or fuel type you need we have the right heating solution.

- Gas heaters up to 150 MBTUH
- Heat Pump heaters up to 61 MBTUH
- Electric heaters up to 92 MBTUH

Complete your system with the Protégé Series.

The Protégé Series above ground pool pumps and filters keep your above ground pool clean and ready to enjoy. The series works perfectly in combination with our gas, heat pump and electric pool heaters. You can combine our Sand Filter (SF) with either the Above Ground Pump (AGP) or our Variable Speed Pump (VSP). For a complete ready to install system our Cartridge Filter Pump (CFP) or Sand Filter Pump (SFP) are the best choice.

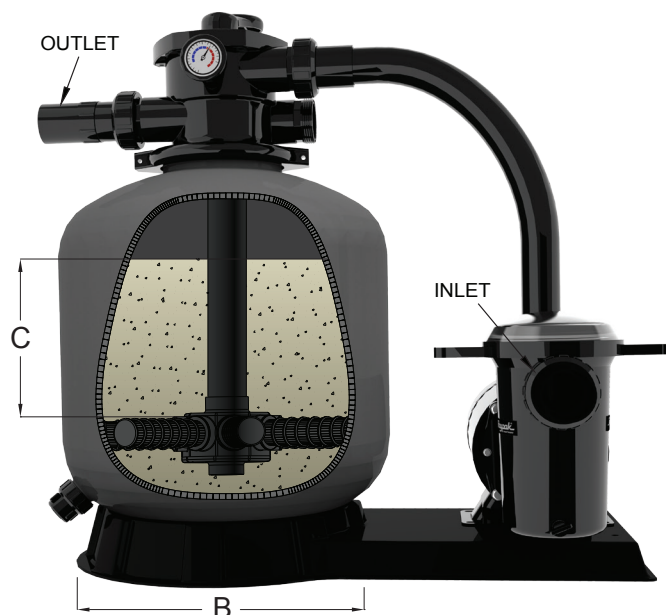

Boost Performance

Protégé products are the perfect companion to our pool heaters. Keeping your system clean and clear of debris helps the performance of your heater and contributes to the health and longevity of your above ground pool system.

Build Your System

Our Protégé Series gives you the most options for building your ideal above ground pool system.

Model	Dimensions - inches (mm)		Valve Port Size (inches)	Silica 16/30* Weight lbs. (kg)	Pump Model	Power (HP)	Speed
	Filter Diameter B	Silica Height C					
RPSFP16	15.7 (399)	6.9 (175)	1.5	77 (35)	RPAGP75	0.75	Single
RPSFP18	17.7 (450)	8.3 (211)	1.5	99 (45)	RPAGP100	1.0	Single
RPSFP21	20.7 (526)	9.3 (236)	1.5	209 (95)	RPAGP150	1.5	Single
RPSFP181	17.7 (450)	8.3 (211)	1.5	99 (45)	RPAGP102	1.0	Dual
RPSFP211	20.7 (526)	9.3 (236)	1.5	209 (95)	RPAGP152	1.5	Dual

*Note: Recommended silica weight will vary depending on media size. Raypak recommends media size of 0.5 - 0.8mm.

Indoor and Outdoor Weatherproof Materials

Protégé products are constructed with durable materials that stand up to normal weather conditions and can be installed indoor or outdoor.

Easy to Maintain

Protégé products are designed to make cleaning easy, with large baskets on our pumps and a transparent lid that let's you check the level of trapped debris at a glance.

Easy To Connect

Protégé products are quick and easy to install onto existing above ground pool pads or on new above ground pools. Save even more time and money when installing one of our filter/pump combination systems.
