

Professional-Series Pool Heaters

Models 9	26-1178
----------	---------

Outdoor only

Date:	Job:	Location:
Equipment Tags:	Engineer:	Contractor:
Model:	Notes:	
Prepared by:		Gas Type: Natural Gas 🗌 Propane 🗌

82% Thermal efficiency

100% Factory fire-tested

Limited twenty-year warranty against thermal shock damage

Limited five-year heat exchanger warranty

Maximum setpoint: 106°F

A floor load of 70 lbs./sq. ft. or less

Cuts fuel costs substantially because the standby and radiation losses normal to other boilers are eliminated

Operates with water temperature at the tubes as low as $105^\circ \mbox{F}$ without condensing

Proudly assembled in the USA

Features and Options

Heat Exchanger

- ASME Inspected and stamped, 160 PSIG
- National Board registered
- Bronze headers
- Cupronickel finned tubing
- ASME Steel tube sheet
- Silicone high-temp O-rings
- 125 PSIG ASME pressure relief valve
- Temperature and pressure gauge (H/CWR only)
- Water connections
 - Left-hand (standard)
 - A-6 Right-hand

Controls

- 120 VAC, 60 Hz, 1 Ph power supplyr
- 120/24 V Transformer
- 100% Pilot shutoff/lockout
- Electronic, intermittent ignition device (IID) pilot
- High limit, manual reset, fixed, 180°F
- High limit, auto reset, fixed, 140°F
- Flow Switch (optional w/UG)
- Economaster pump delay (H /CWR only)
- On/Off power switch
- Poolstat, 66-106°F

Gas Train

- Combination valve
- Manual main gas shutoff cock
- Firing mode on/off
- Fuel (Left-hand connection)
 - Natural gas

_				
Propane gas	(minimum	drade	HD-5)	۱

Construction

- Outdoor construction
- Enclosed front controls
- Stainless steel burners
- PolyTuf powder-coat finish
- Design Certified ANSI Z21.56/CSA 4.7

Base

J-1 Combustible floor shield

Bypass Options (see following)

UG Unitherm governor (default)
H H-Bypass
CWR Cold water run

Venting

Stackless top

Additional Safety Controls

B-22	Pump override (H / CWR only)
C-5	Latching lockout module (CSD-1)
E-4	Alarm package
	3" bell
	4" bell
🗌 F-1	Flow switch on outlet (UG only)
F -9	Low water cut-off
□ I-6	Temp control, 100°F max
M-1	Safety valve, motorized
M-10	Safety valve, solenoid
S-1	Low gas pressure switch, manual reset
S-2	High gas pressure switch, manual reset
Z-7	T&P gauge (UG only)

Job: _____

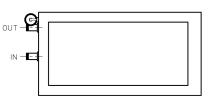

APPROVE Product Submittal for Raytherm[®] - Type P

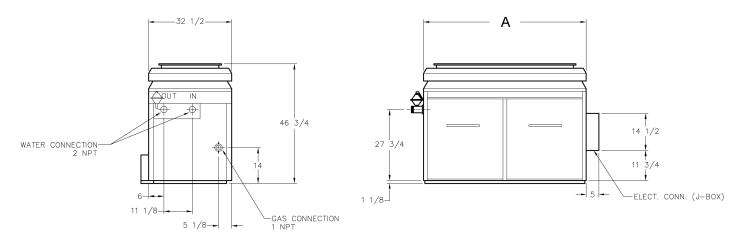

Regulatory Agency Requirements					
🗌 G-	1 (CSD-1 (factory mtd)			
Ex	empt	from CSD-1 as of 2004 edition			
G-	15 (CSD-1 field upgrade kit			

UG option shown.

Model	MBTUH Nat (x1000)* (kWh)		Width A	Approx.	Heater	
No.	MBTU Input	MBTU Output	Inches (mm)	Shipping Weight Ibs. (kg)	Amp Draw	
P-926	926.0 (271)	759.4 (222)	52-3/8 (1330)	700 (317)		
P-1083	1083.0 (317)	888.0 (260)	59-1/4 (1502)	810 (367)	<12	
P-1178	1178.0 (345)	966.0 (283)	63-5/8 (1616)	800 (362)		

Ratings shown are for natural gas at elevations up to 2,000 feet. For elevations over 2,000 feet, reduce ratings at the rate of 4% for each 1,000 feet above sea level.

* For propane ratings, multiply natural gas values by 0.955.

The Unitherm Governor is a patented 3-way valve built into the inlet header, which automatically maintains the water entering the heat exchanger at the precise temperature needed to prevent condensation and scale.

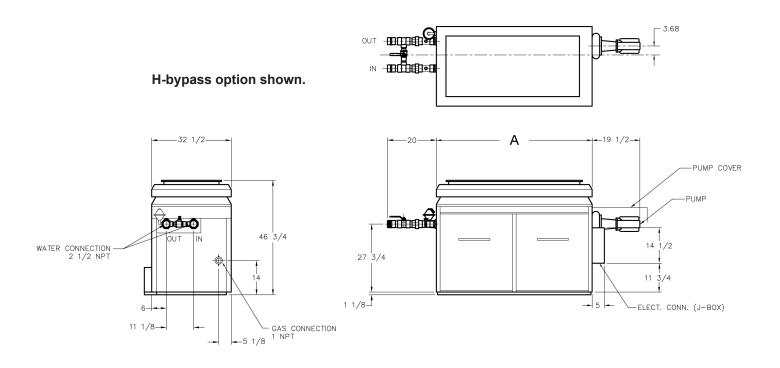

HEATER FLOW RATES with UG.

Model No.	Min. Flow GPM (LPM)	Max. Flow GPM (LPM)
P-926		
P-1083	60 (227)	120 (454)
P-1178		

Adjust flow to obtain 120°F outlet temperature.

Job: _____

Model	MBTUH Nat (x1000)* (kWh)		Width A	Approx.	Heater

* For propane ratings, multiply natural gas values by 0.955.

Rear header-mounted pump is 1/2 HP, 120 VAC 1Ø 60 Hz, 7 amp.

The H-bypass design uses a pumped bypass with manual valves to control the inlet water temp to avoid condensation and scaling.

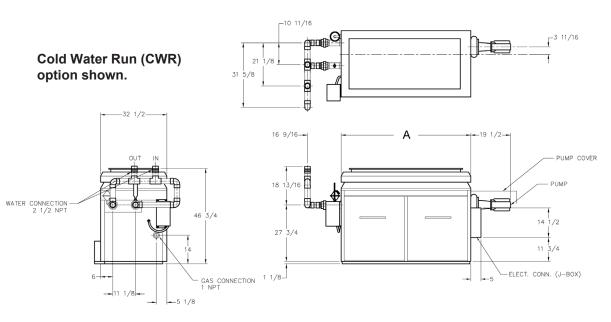

Primary/secondary piping is required for proper operation.

HEATER FLOW RATES with H-bypass

Model No.	Loop Flow GPM (LPM)	Heater Flow GPM (LPM)	
P-926	20-50 (76-189)

* For propane ratings, multiply natural gas values by 0.955.

Rear header-mounted pump is 1/2 HP, 120 VAC 1Ø 60 Hz, 7 amp.

The Cold Water Run bypass design uses a variable-speed injector pump to automatically control the inlet water temperature to avoid condensation and scaling, even when the pool water changes temperature rapidly.

Primary/secondary piping is required for proper operation.

Separate 120 VAC 1Ø or 240 VAC 1Ø power required for Cold Water Run control. The control provides 3-phase power to the injector pump.

Also requires DP-47 Flange Kit for Injector Pump. The injector pump is included with the option, and ships loose for installation at the bypass inlet.

	Heater Pump			P-45 Injector Pump*
