

Furnaces

W96P

96% AFUE Two-Stage Multi-Position Gas Furnaces

We've thought of everything to bring you efficient and dependable indoor comfort solutions.

- **Enjoy greater comfort and performance** thanks to a two-stage operation that offers a more **consistent indoor environment** – keeping cold spots to a minimum. The two-stage heating design primarily operates on low-speed, only temporarily switching to high during peak cold-weather conditions.
- **Dependability** is of the utmost importance when it comes to your family's comfort. Our W96P Gas Furnace comes standard with the direct spark ignition system (DSI), which is one of the **most dependable ignition systems** available today. This technology is the same proven design used on gas ovens and stoves.
- **Protect Your Home** with the industry's first blocked drain sensor which will shut off your furnace when a drain is blocked, preventing water spillage and potential water damage to your home. It also prevents seasonal start-up issues, which means fewer warranty claims. All this translates to fewer repair bills and more cozy nights at home.
- **Quiet and efficient comfort** is what you get with W96P Gas Furnace. The new patented heat exchanger design provides **improved airflow**, which reduces operating sound by 20%**², making it one of the **quietest furnaces on the market**. And because it's **high-efficiency**, your monthly energy bill will give you even more reasons to smile.

**High Efficiency
up to 96% A.F.U.E.***

**Input rates from
40 to 115 kBtu**

Brampton Ontario L6Y0P5

* Annual Fuel Utilization Efficiency (A.F.U.E) measures the amount of heat delivered to a home compared to the amount of fuel that is supplied to the unit. Higher A.F.U.E. ratings reflect higher efficiency.

** Testing showed, on average, a 20% reduction in sound when compared to previous WeatherKing® gas furnace models.
