

NEXT-GEN II

Air Cooled Dual Pak Units 3 to 22 HP

Unit shown with optional components installed.

The new Dual Pak (D-Pak) units incorporate design features from the award-winning Next-Gen Uni-Pak Compressor Units to improve efficiency, performance and serviceability. The D-Pak combines two compressors and one icemaker condenser circuit into a single economic package.

Standard Features

- Available with Discus, Scroll, or Semi-hermetic compressors
- All-weather G90 galvanized steel painted enclosure
- Open view, flow-through equipment guard
- Easy Access for installation and maintenance:
 - Removable top and side panels
 - Large control panel with swing wide hinged door
 - Quick access to shut-off valves from the cabinet exterior
 - Color-coded point-to-point wiring
- Horizontal discharge air flow
- Enhanced copper tubes with aluminum fins condenser
- Integral liquid sub-cooling circuit for higher efficiency
- Liquid line kit with sealed filter/drier and sight glass
- Suction line piping
- Crankcase heater
- Heavy duty three phase condenser fan motor(s)
- Dual pressure (auto reset) control with flexible control lines

Options

- Stainless steel housing
- Electric defrost provisions
- Defrost sub circuit fuses or breakers
- Replaceable core liquid and suction filters
- Suction accumulator
- Sealed suction filter
- Oil separator
- Crankcase pressure regulator (mounted)
- External fused or non-fused disconnect
- Single Speed EC motor
- Heated and insulated receiver with low pressure bypass timer (temperature controlled)
