

Rheem EcoSense® Hybrid Heat Pump

Our most advanced, energy-efficient electric water heater – its 2.45 Energy Factor lowers energy costs

Efficiency

- High 2.45 EF reduces operating cost \$329 annually compared to a standard 50-gallon electric model

Performance

- 8700 Btu/h compressor: the most powerful in its class – more heat can be created by the heat pump and less by the costly electric elements. This translates into significant fuel saving in real life applications. For still more savings, the Rheem EcoSense hybrid has a wider temperature operating range, which means the heat pump can be used to heat water more days throughout the year.
- Ambient operating range: 37-120° F is widest in class, offering more days of HP operation annually; designed to meet Northern Climate Spec (Tier 1)

Operation Modes

- Energy Saver
- Heat Pump Only
- High Demand
- Electric Heat Only
- Vacation: 2-28 days (or placed on hold indefinitely)

Full-Color LCD Display

- Intuitive, back lit touch screen with diagnostics

Easy Installation

- Easy access side connections
- Narrow 21" diameter, fits through access doors
- Easily replaces a standard electric water heater

Plus...

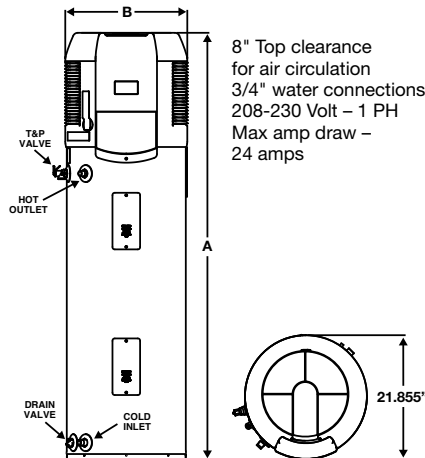

- EcoNet™ compatible for future integration with home automation, energy management and demand response systems
- Patented magnesium anode rod with resistor extends the life of the tank
- 3/4" NPT water inlet, outlet and condensate drain connections
- Incoloy stainless steel resistor elements; dry-fire protection
- Easy access, top mounted washable air filter
- 2-1/2" Non-CFC foam insulation
- Brass drain valve
- Temperature and pressure relief valve

Warranty

- 12-Year limited tank and parts warranty*

*See Residential Warranty Certificate for complete information

Units meet or exceed ANSI requirements and have been tested according to D.O.E. procedures. Units meet or exceed the energy efficiency requirements of NAECA, ASHRAE standard 90, ICC Code and all state energy efficiency performance criteria.

Rheem EcoSense Hybrid Heat Pump Water Heater

50-Gallon Capacity
208-230 Volt / 1 PH / 24 Amps
Electric

EcoSense®

Rheem EcoSense® Hybrid Heat Pump

Full-Color LCD Display Screens

Start Up Screen

← Press "Standby" to start

Energy Saver Mode 1
Best energy efficiency for typical hot water demands

Home Screen
Factory set to default to the "Energy Saver" mode screen

Modes 2-5

HP Only Mode:
Provides highest energy efficiency when hot water demands are low

High Demand Mode:
Right selection for very high demand (simultaneous operation of multiple hot water fixtures)

Electric Heat Mode:
Operates like a standard electric water heater; no heat pump

Vacation Mode:
Can be set from 2 to 28 days (82°) or placed on "hold" indefinitely

Settings

- Select scale: Fahrenheit or Celsius
- Lock or unlock the home screen; Setting screen remains unlocked
- Enable/disable beeping alarm

Service

Current status of HB50ES hybrid water heater

Displays model & serial nos., SW version; change network instance or run a test

Shows temperatures in tank, ambient air, suction, evaporator and discharge

Displays current alarms and past alarms; ability to clear all alarms

Enabled

Press to toggle between Enabled & Standby

- Enabled: heats water
- Standby: doesn't heat water

Note: "Modes" can't be selected when unit is in "Standby"

Heat Pump Only Mode: Tank Recovery

Rheem Hybrid (50 gal) vs. Competitor Hybrid (50 gal)
