

- and three-phase models, and in capacities ranging from 2 through 5 tons.
 Uses common roof curbs and
- Uses common roof curbs and is easily adaptable to either down discharge or side discharge to accommodate almost any installation requirement.

Ruud is one of them.

Quality That Endures

Ruud *Achiever*® *Series* 13 &14 SEER and *Ultra Series*TM 16 SEER Package Gas Electric Units combine money-saving efficiency, whisper-quiet operation, environmental-friendliness and superb performance to bring you peace of mind – year after year. Nothing performs more reliably than a Ruud Package Gas Electric Unit. It's that simple.

All of our residential package units - regardless of efficiency level — feature the Scroll® Compressor. The scroll compressors uses a more advanced technology than traditional reciprocating compressors. They have fewer moving parts, and they are quieter, more efficient, and longer lasting.

2. Durable Cabinet with Louvered Condenser Compartment. Our cabinets have a powder painted finish that protects them from the harshest weather extremes and keeps them looking new for years. And our louvered condenser compartment is the best in the industry for protecting the condenser coil against yard hazards and weather extremes.

- **3. Grille/Fan Motor Mount.** Our motor mount helps protect the fan motor from the elements for longer life. Its design also helps reduce vibration and noise.
- **4. Furnace Compartment.** Located inside the easily accessible furnace compartment is the control box, draft inducer motor, in-shot gas burners, the gas valve and manifold. Control box operational controls are "up front" for quick access and service diagnostics. The draft inducer motor is specially designed to quietly provide combustion air while simultaneously venting outdoors the combustion products from the furnace heat exchanger. In addition to the draft inducer motor, the in-shot gas burners, gas valve and manifold efficiently regulate the flow of gas for combustion. These new gas/electric units also feature direct-spark ignition and remote flame sensors for added reliability and efficiency.
- **5. Matched Blower/Evaporator Coil Unit.** The blower is responsible for the flow of air into your ductwork. It has been designed to match the evaporator coil and other system components for maximum efficiency. In addition, all of the RRRL models offer a variable speed motor that provides more even comfort throughout your home.
- **6. Tubular Heat Exchanger.** Our new package gas electric units feature a tubular heat exchanger design. Tubular heat exchangers are more efficient and durable than older-style clamshell heat exchangers. The factory standard heat exchanger is backed by a ten year limited warranty. All RRRL models feature a stainless steel heat exchanger which is backed by a limited lifetime warranty.
- **7. Service Fittings.** Exterior service fittings enable a serviceman to quickly determine unit operating conditions.

Package Gas Electric Units

Limited Warranty Information

All of our Ruud package units were developed with reliability in mind. All RRNL and RRPL models have a conditional parts warranty of 10 years (registration required). The RRRL has a 10-year standard parts warranty. The Scroll Compressor in the single-phase 13, 14 & 16 SEER models installed in commercial applications, have a five-year limited warranty. The 13, 14 & 16 SEER single-phase models installed in residential applications have a 10-year limited compressor warranty. The Factory Standard Heat Exchanger is backed by a 10-year limited warranty. A Stainless Steel Heat Exchanger on a single-phase model installed in a residential application features a limited lifetime warranty. A twenty-year limited warranty is offered on Stainless Steel Heat Exchangers on single and three-phase models installed in commercial applications. The condenser and evaporator coils are warranted for five years against leaks caused by factory defects. All other parts installed in commercial applications have a one-year warranty.

Protection You Can Count On

While your Ruud equipment is incredibly reliable and covered by an outstanding warranty, you can extend your warranty coverage with Protection Plus® extended service protection. Then you can relax and enjoy the comfort of your Ruud gas electric unit — without worrying about the cost of parts or labor for unexpected repairs. And when Protection Plus is purchased in conjunction with your contractor's maintenance program, you can enjoy the peace of mind that your equipment will be both maintained and repaired — as needed and without additional expense.

Ask your contractor about the variety of Protection Plus plans now available. For more information, call 1-877-276-4294 or visit www.protectionplusonline.com.

KwikComfort® Financing
