

# Model: RACA14

## Package Air Conditioners

Mainline<sup>®</sup> RACA14 Package Air Conditioners are designed for long lasting performance so you can make the most of your moments at home.

- **Quality and Durability.** Our Package Air Conditioners are developed with features that provide unmatched durability for years of worry-free operation.
- **Efficient Operation.** The Micro-channel refrigerant system is responsible for superior heat transfer capabilities.

## Model: RACA14

### Package Air Conditioners

**Efficient Operation and greater comfort** is what you'll get with the RACA14. Designed with a micro-channel refrigerant system that includes all-aluminum evaporator and condenser coils. These coils fight corrosion and keep your unit operating like a pro. Micro-channel design is also responsible for superior heat transfer capabilities and uses up to 58% less refrigerant than standard copper tube aluminum fin coil models.

**Quality and Durability** are built into the RACA14. The unique water management design diverts water away from the critical components of your unit, preventing leaks and other potential problems. The louvered coil protection prevents damage to the coil fin, which keeps the coil running longer for a better overall performance. And for unmatched durability, our direct spark ignition with remote flame sensing provides unmatched reliability for years of worry-free operation.

**Quieter operation** is attributed to several design features of the RACA14. A durable cabinet combined with our scroll compressor and an elevated base pan helps reduce noise for comfort that's as quiet as it is durable.

- **Cooling Efficiency:**
  - 14 SEER
- **Available Sizes:**
  - 2 - 5 Ton
- **Limited Warranty:**\*
  - Compressor - 5 years
  - Parts - 1 year
