

Model: RACA15

Package Air Conditioners

Mainline[®] RACA15 Package Air Conditioners are designed for long lasting performance so you can make the most of your moments at home.

- **Quality and Durability.** Our Package Air Conditioners are developed with features that provide unmatched durability for years of worry-free operation.
- **Efficient Operation.** The Micro-channel refrigerant system is responsible for superior heat transfer capabilities.

Model: RACA15

Package Air Conditioners

Efficient Operation and greater comfort is what you'll get with the RACA15. Designed with a micro-channel refrigerant system that includes all-aluminum evaporator and condenser coils. These coils fight corrosion and keep your unit operating like a pro. Micro-channel design is also responsible for superior heat transfer capabilities and uses up to 58% less refrigerant than standard copper tube aluminum fin coil models.

Quality and Durability are built into the RACA15. The unique water management design diverts water away from the critical components of your unit, preventing leaks and other potential problems. The louvered coil protection prevents damage to the coil fin, which keeps the coil running longer for a better overall performance. And for unmatched durability, our direct spark ignition with remote flame sensing provides unmatched reliability for years of worry-free operation.

Quieter operation is attributed to several design features of the RACA15. A durable cabinet combined with our scroll compressor and an elevated base pan helps reduce noise for comfort that's as quiet as it is durable.

- **Cooling Efficiency:**
 - 15 SEER
- **Available Sizes:**
 - 2 - 5 Ton
- **Limited Warranty:*****
 - Compressor - 5 Years
 - Parts - 1 year

*Annual Fuel Utilization Efficiency (AFUE) measures the amount of heat delivered to a home compared to the amount of fuel that is supplied to the unit. Higher AFUE ratings reflect higher efficiency.

**Testing showed, on average a 20% reduction in sound when compared to previous Mainline gas furnace models.
