

Air Handlers

WH1P

Standard Efficiency Air Handler

The WeatherKing® WH1P Air Handler is engineered to improve energy savings and performance all year long.

- **Quiet and Efficient**

The WH1P Air handler is designed with a sturdy steel cabinet with one inch of foil-faced insulation, offering excellent thermal and sound insulation, which means you get quiet and efficient comfort.

- **Humidity Control**

The WH1P Air Handler adjusts airflow in the home to help control humidity. Airflow can be set for specific needs so your home feels just the way you want it.

- **Performance**

The factory-installed indoor aluminum cooling coil is the key component for your air handler. The coil is essential to humidity control and improved system performance. The new lanced fin design also provides maximum performance and increased efficiency. The high grade condensate drain pan keeps the unit operating smoothly and the corrosion-resistant aluminum endplates keep the unit looking as good as it runs.

**Motor:
PSC
Single Stage Airflow**

**Efficiency:
Up to 15 SEER**
