The Rheem *Prestige*™ Series Package Gas Electric units are designed for durable, long lasting performance while keeping your utility bills low. So you can make the most of your moments at home.

RGEA16 *Prestige*™ Series
16 SEER

Peace of Mind

Relax with Rheem. Our Package Gas Electric units include a list of features that ensure performance that will keep your home comfortable for years to come. We also offer some of the best warranties in the industry.

Reliability

We're serious about the quality of all of our products. That's why our Package Gas Electric units are developed with technology that provides unmatched reliability and durability for years of worry-free operation.

Premium Comfort

The variable-speed motor adjusts airflow in your home and provides dehumidification for better overall indoor air quality and comfort.

INTEGRATED HOME COMFORT

Rheem.com

We Thought of Everything... And Then Some

The Rheem *Prestige*™ Series Package Gas Electric line was developed using our 360°+1 design philosophy, which means every detail of the product is meticulously evaluated from every angle. We consider the work that goes into installing and servicing our products, as well as how we can deliver the very best homeowner experience. And then we take it a step further. That's 360°+1. And that's why you can count on your Rheem Package Gas Electric unit to bring you and your family years of comfort.

All Wrapped Up

The Rheem *Prestige*™ Series offers comfort that fits your lifestyle – and your budget. Unique design features are built in to deliver years of reliable and efficient operation. It's all the comfort you deserve, wrapped up in one smart unit.

Efficient operation and greater comfort is on everyone's mind these days. The RGEA16 comes standard with a

① **variable-speed motor** that automatically adjusts the flow of warm or cool air in your home. It uses less energy than a single-stage motor and is engineered for better dehumidification, which provides you with better indoor air quality. The RGEA16 also features a tubular ② **stainless steel heat exchanger design** for added efficiency and durability which is backed by a limited lifetime warranty. The 100% scroll compressor boosts performance and efficiencies even more. You'll like the way it operates – and you'll love the difference it makes on your energy bill.

Reliability is essential to your comfort at home.

That's why we've designed our Package Gas Electric units with a unique water management design that diverts water away from the critical components of your air conditioner, preventing leaks and other potential problems. We've also included ③ **louvered coil protection** to prevent damage to the coil fin. This added protection keeps the coil running longer for a better overall performance from your unit. And for unmatched durability, our direct spark ignition with remote flame sensing provides unmatched reliability for years of worry-free operation.

Quieter operation is attributed to several design features of our new *Prestige*™ Series Package Gas Electric units. A durable cabinet design combined with our scroll compressor and an elevated base pan helps reduce noise for comfort that's as quiet as it is reliable.
