

Model: RGEA16

Package Gas Electric Units

The Mainline[®] RGEA16 Package Gas Electric Units are designed for long lasting performance so you can make the most of your moments at home.

- **Premium Comfort.** The variable-speed motor adjusts airflow in your home and provides dehumidification for better overall indoor air quality and comfort.
- **Quality and Durability.** Our Package Gas Electric Units are developed with features that provide unmatched durability for years of worry-free operation.

Model: RGEA16

Package Gas Electric Units

Efficient Operation and greater comfort is what you'll get with the RGEA16. This unit comes standard with a variable-speed motor that automatically adjusts the flow of warm or cool air in your home. It uses less energy than a single-stage motor and is engineered for better dehumidification, which provides you with better indoor air quality. The RGEA16 also features a tubular stainless steel heat exchanger design for added efficiency and durability.

Quality and Durability are built into the RGEA16. The unique water management design diverts water away from the critical components of your unit, preventing leaks and other potential problems. The louvered coil protection prevents damage to the coil fin, which keeps the coil running longer for a better overall performance. And for unmatched durability, our direct spark ignition with remote flame sensing provides unmatched reliability for years of worry-free operation.

Quieter operation is attributed to several design features of the RGEA16. A durable cabinet combined with our scroll compressor and an elevated base pan helps reduce noise for comfort that's as quiet as it is durable.

- **Cooling Efficiency:**
 - 16 SEER
- **Heating Efficiency:**
 - 81% AFUE*
- **Motor:**
 - Variable-speed
- **Available Sizes:**
 - 2, 3, 4 and 5 Ton
- **Limited Warranty:****
 - Compressor - 5 years
 - Stainless Steel Heat Exchanger - 20 years
 - Parts - 1 year
