technology allows you to control your comfort from home or away.**

We Thought of Everything... And Then Some.

The Rheem Prestige™ Series Gas
Furnace was developed using our 360°+1
design philosophy, which means every detail
of the product is meticulously evaluated from
every angle. We consider the work that goes into
installing and servicing our products, as well as
how we can deliver the very best homeowner
experience. And then we take it a step further.
That's 360°+1. And that's why you can
count on your Rheem gas furnace
to bring you and your family
years of comfort.

Rheem-Exclusive PlusOne[™] **Ignition System**

Industry-First PlusOne[™] **Diagnostics**

We Did the Work So You Can Stay Comfortable

Our gas furnace line was already recognized as best in its class***, but that didn't stop us from making it better. We designed our new *Prestige* Series Gas Furnace to provide your home with reliable, easy-to-maintain and quiet comfort for years to come.

Reliability is essential to your home comfort. That's why we've engineered our gas furnace with the PlusOne Ignition System. Our Direct Spark Ignition is a Rheem-exclusive feature that's nine times more reliable than most hot surface igniters. It's also the same proven design used in commercial HVAC equipment and gas home appliances. Our patented heat exchanger is quick and easy to clean – when needed – by your local independent Rheem Contractor. And a clean furnace is a long-running furnace.

Enjoy greater comfort and performance thanks to a two-stage operation that offers a more consistent indoor environment – keeping cold spots to a minimum. The two-stage heating design primarily operates on low speed, only temporarily switching to high during peak cold-weather conditions. And a variable-speed fan motor efficiently moves at different speeds to control airflow for a more comfortable environment. The R802V also delivers 80% AFUE, which means 80% of the fuel in your furnace is converted to heat.

Engineered for High-Performance

- Two-Stage Operation Provides superior comfort by knowing when to switch into high gear, so there is no need for you to adjust the thermostat.
- Variable-Speed Motor Uses less energy than a single-stage motor. It's engineered for better dehumidification, which provides you with better indoor air quality.

Fast and accurate diagnostics are a big benefit to both you and your Contractor. The Rheem *Prestige* Series Gas Furnace features PlusOne Diagnostics, our industry-first 7-segment alphanumeric LED display that simplifies troubleshooting. Just in case there's a need, service calls are faster, which ultimately saves you money.

Hassle-free installation saves you and your Contractor time and trouble.

The 34" cabinet fits nicely in tight spaces allowing for both new construction and retrofit installations.

Why Rheem?

Relationship, Dedication and Innovation

Rheem makes customers our first priority. Our approach as a company is to keep the dialogue ongoing and to listen. Then act. The innovations we've developed throughout the years in both the HVAC and water heating industries are a direct result of that process. And we have a long list of industry firsts to show for it, with more to come. Rheem is dedicated to providing the products your customers need and the opportunities you want to expand your offerings and increase profitability. That's the Rheem 360°+1 approach to partnership.

How to Speak HVAC

Single-Stage:

One level of operation, with no differentiation between peak or non-peak heating demands.

Two-Stage:

More than one level of operation, which saves energy during non-peak heating demands.

Efficiency:

Description for how effectively incoming energy is converted to outgoing energy. The higher the number, the more efficient the unit – and the lower the operating costs.

AFUE:

Annual Fuel Utilization Efficiency. Used to express the efficiency of gas furnaces. The higher the AFUE rating, the more efficient the unit.

Heat Exchanger:

Responsible for transferring heat from

furnace burners to the blower. Rheem uses some of the finest heat exchangers in the industry, offering limited lifetime warranties on some models.

Variable-Speed Motor:

Used in higher-efficiency indoor and outdoor units.

Automatically adjusts the flow of warm or cool air in your home for ultimate comfort.

When it's time to upgrade or replace your system, Rheem makes it easy. Our full line of energy-efficient gas furnaces is built for your comfort – helping your family stay the perfect degree of comfortable while saving on energy and maintenance costs. **Visit Rheem.com today to learn more.**
