RELY ON RUUD.™

Peace of Mind

Our Package Gas Electric units include a list of features that ensure performance that will keep you relying on Ruud for years to come for your home comfort. We also offer some of the best warranties in the industry.

Reliability

We're serious about the quality of all of our products. That's why our Package Gas Electric units are engineered with technology that provides unmatched reliability and durability for years of worry-free operation.

We Thought of Everything... And Then Some.

The Ruud *Achiever*® Series Package Gas Electric line was developed using our 360°+1 design philosophy, which means every detail of the product is meticulously evaluated from every angle. We consider the work that goes into installing and servicing our products, as well as how we can deliver the very best homeowner experience. And then we take it a step further. That's 360°+1. And that's why you can count on your Ruud Package Gas Electric unit to bring you and your family years of comfort.

All Wrapped Up

The Ruud *Achiever*® Series offers comfort that fits your lifestyle – and your budget. Unique design features are built in to deliver years of reliable and efficient operation. It's all the comfort you deserve, wrapped up in one smart unit.

Reliability is essential to your comfort at home. That's why we've engineered our Package Gas Electric units with a **1 micro-channel refrigerant system**. The system includes all-aluminum evaporator and condenser coils that fight corrosion and keep your unit operating like a pro. And for unmatched durability, our direct spark ignition with remote flame sensing provides unmatched reliability for years of worry-free operation.

The RGEA15 is engineered with a unique **2 water management design** that diverts water away from the critical components of your air conditioner, preventing leaks and other potential problems. We've also included **3 louvered coil protection** to prevent damage to the coil fin. This added protection keeps the coil running longer for a better overall performance from your unit.

Efficient operation is on everyone's mind these days, which is another reason our **1 micro-channel refrigerant system** is a plus. Micro-channel technology is responsible for superior heat transfer capabilities and uses up to 58% less refrigerant than standard copper tube aluminum fin coil models. The RGEA15 also features a tubular **4 heat exchanger design** for added efficiency and durability which is backed by a ten-year limited warranty. The 100% scroll compressor boosts performance and efficiencies even more. You'll like the way it operates – and you'll love the difference it makes on your energy bill.

Quieter operation is attributed to several design features of our new *Achiever*® Series Package Gas Electric units. A durable cabinet design combined with our scroll compressor and an elevated base pan helps reduce noise for comfort that's as quiet as it is reliable.

RELY ON RUUD.™

*Annual Fuel Utilization Efficiency (AFUE) measures the amount of heat delivered to a home compared to the amount of fuel that is supplied to the unit. Higher AFUE ratings reflect higher efficiency.

For complete details of the limited and conditional warranties, including applicable terms and conditions, contact your local dealer or go to **Ruud.com for a copy of the product warranty certificate. Conditional warranties must be registered through **registermyunit.com**.
