RE: Space Heating Applications

Please be advised that all residential gas fired water heaters manufactured by Rheem Manufacturing Company are dual certified by CSA International, formerly AGA, and are suitable for both potable and space heating applications. Provisions should be made to prevent the installation of a new water heater from being connected to any closed heating system or components that have previously been used with a non-potable water-heating appliance. Please refer to the information contained in our standard Use and Care manual for additional information regarding installation and safety information.

Please feel free to contact your local Rheem representative or our Technical Service Department if we can be of further assistance.

Sincerely,

A handwritten signature in blue ink that reads "William Pedrick".

William Pedrick  
Residential Product Manager
